Skills

Unreal Engine
Unity
C++
C#
Lua
Python
Perforce
Git
HTML
CSS
Java
Python
SQL

Education

Bachelor of IT - Games Programming

Academy Information Technology - Sydney, AU (May 2018 - May 2021)

Certificate - Robotics Fundamental

Online Course (December 2020 - February 2021)

Work experience

Playside Studios — Software Engineer (Gameplay)

Jun 2024 – Present

Project: Game of Thrones: War for Westeros (RTS)

C++, Unreal Engine

- Developed gameplay features using Unreal Engine (C++, Blueprints, UMG)
- Built tooling systems leveraging Design Data to improve designer workflows and runtime tuning
- Contributed to gameplay logic and player experience polish across multiple RTS systems
- Worked closely with AI behaviour trees and blackboard systems to support unit decision-making
- Worked with ECS-structured engine architecture as part of feature and systems development
- Version control: Perforce

Big Ant Studios — Junior Gameplay Programmer

Jan 2024 – Jun 2024

Projects: Tiebreak | Rugby 2025 | Cricket 2024

C++, Custom Engine

- Developed gameplay and audio systems in C++ for a custom ECS-based engine
- Resolved bugs and edge cases across animation, input, and game flow
- Supported cross-functional development across sports simulation systems
- Version control: Git

Motorsport Games — Junior Gameplay Programmer

Jul 2022 – Nov 2024

Projects: KartKraft | IndyCar (Unreleased)

C++, Unreal Engine

- Created and maintained gameplay, UI, audio, and network systems using Unreal Engine 4/5
- Developed internal C++ and Lua scripting tools to enable non-programmers to safely modify game behavior

Certificate - Raspberry Pi Full Stack

Online Course (July 2019 - September 2019)

Certificate IV - General Business

City Institute - Sydney, AU (May 2017 - May 2018)

High School Diploma

Arima Koukou - Kanagawa, JP

(March 2015)

Languages:

English - Fluent (Speaking, Writing)

Portuguese - Native

Japanese - Intermediate (Speaking, Writing)

- Integrated multiplayer systems, debugging replication and client-server sync in Visual Studio
- Built extensible modules for car handling, race logic, and dynamic HUD updates
- Strong proficiency with Blueprints, UMG, and Unreal's AI system (behavior trees, blackboards)
- Version control: Perforce

Outlandish Arts — VR Developer

Feb 2021 – May 2021

Project: Fire (VR experience)

C#, Unity

- Developed VR interactions and tools in Unity (C#) for climate-focused narrative project
- Integrated spatial audio, text-to-speech, and localized 3D assets
- Optimized performance and user accessibility across VR platforms

LiminalVR — Unity Developer

Feb 2021 – May 2021

Project: ColorgizeVR (LiminalVR Platform)

C#, Unity

- Developed gameplay, UI, and VFX systems for VR
- Created interactive object animations and optimized 3D assets
- Awarded Bronze at the AEAF Awards (VR Experience category)

The Studio — Web Developer & IT Intern

Aug 2020 – Feb 2021

- Rebuilt core systems for company site, replacing WordPress plugins with custom solutions
- Developed membership portal, secure payment system, and API-integrated UX
- Maintained system architecture for scalable and secure operations
